Introduction

This report satisfies the requirements for SIT205 Assignment 2, using the text analytics topic. The code associated with this report is contained in a Jupyter Notebook named `SIT205 Assignment 2 - Project Code`. This report, the code, and associated data files can be found on GitHub at this link:

https://github.com/PhilipCastiglione/SIT205_Watson

Data

For this report we chose to analyse the recent events of Australian politics using text produced by members of the general public on Twitter.

Using the Twitter API, 6,078 tweets were collected containing the hashtag `#libspill`, which were made by 2,534 unique twitter user accounts. These tweets were dated between Saturday, 8th September and Monday, 17th September in 2018.

The tweets were cleaned of excess whitespace, tokenized and stripped of urls/links, @ mentions, and hashtags. Tweets were further filtered, excluding empty tweets, retweets and short tweets (less than 41 characters). The reduced set of 941 documents was the final document corpus for textual analysis.

Due to the large number of categories, entities and keywords identified by the Watson NLU API for this theme, the body of this report displays an example snapshot of each result, while the corresponding Appendices contain an output of all results.

- Appendix 1 - Category Analysis - Full Output
- Appendix 2 - Entity Analysis - Full Output
- Appendix 3 - Keyword Analysis - Full Output

Analysis

Tweets were analysed using the IBM Watson natural language understanding APIs for Sentiment, Emotion, Category, Entity and Keyword.

Sentiment

The percentage of positive, neutral and negative documents in the corpus were as follows:

```
Positive percentage:    17.53%
Neutral percentage:    22.95%
Negative percentage:    59.51%
Ratio of negative to positive:  3.39
```

The ratio of negative to positive sentiments of 3.39 in the corpus expresses a generally negative sentiment in tweets with the hashtag #libspill contained in our corpus.

The average and standard deviation of the positive and negative sentiment scores in the corpus:

```
Positive scores average:    0.571    (Std. Dev. = 0.288)
Negative scores average:    -0.618    (Std. Dev. = 0.204)
```

Emotion

The average and standard deviation of each emotion type in the corpus were then identified:

```
The average score for 'sadness' is:    0.292    (Std. Dev. = 0.178)
The average score for 'joy' is:        0.194    (Std. Dev. = 0.205)
The average score for 'fear' is:       0.140    (Std. Dev. = 0.113)
The average score for 'disgust' is:    0.240    (Std. Dev. = 0.189)
The average score for 'anger' is:     0.225    (Std. Dev. = 0.159)
```

There is a spread of emotions present in the corpus, however 'sadness' represents the modal emotion, followed by 'disgust'.

Category

A total of 465 different categories were found in the 941 document corpus. The entire analysis result is shown in Appendix 1. The top 20 categories by frequency were as follows:

```

The total number of categories in the corpus is:      465

The frequencies of the top 20 most common categories:

/ law, govt and politics/government
275
/ law, govt and politics/government/parliament
218
/ travel/tourist destinations/australia and new zealand
91
/ law, govt and politics/immigration
90
/ news
86
/ law, govt and politics/politics/elections
74
/ art and entertainment/humor
65
/ business and industrial
53
/ art and entertainment/movies and tv/movies
50
/ society/unrest and war
49
/ style and fashion/clothing/shorts
47
/ law, govt and politics/politics
46
/ law, govt and politics
45
/ family and parenting/children
43
/ society/work/unions
40
/ education/school
33
/ food and drink
30
/ law, govt and politics/politics/elections/presidential elections
28
/ society/sex
27
/ law, govt and politics/legal issues/legislation
24

```

The root category is heavily dominated by 'law, govt and politics' as should be expected by the analysis theme.

Entity

A total of 358 unique entities were identified by Watson NLU in the corpus. The entire analysis result is shown in Appendix 2. An example set of 20 entities, with their respective sentiment score average and standard deviation are as follows:

Entity: 5 year	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Matthias corman	Average sentiment: -0.493 (Std. Dev. = 0.000)
Entity: one day	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Duttons	Average sentiment: -0.260 (Std. Dev. = 0.368)
Entity: China	Average sentiment: 0.433 (Std. Dev. = 0.000)
Entity: 30 years	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Somo	Average sentiment: 0.675 (Std. Dev. = 0.000)
Entity: Treasurer	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Tony Wright	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Morrison Government	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: 6 weeks	Average sentiment: 0.000 (Std. Dev. = 0.000)

Entity: you..The Why..we	Average sentiment: -0.729 (Std. Dev. = 0.000)
Entity: Hawks	Average sentiment: 0.501 (Std. Dev. = 0.000)
Entity: 3 year	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: ICAC	Average sentiment: -0.235 (Std. Dev. = 0.000)
Entity: George	Average sentiment: -0.374 (Std. Dev. = 0.000)
Entity: Quantum Mechanics Bastion Caucus	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Pamela Williams	Average sentiment: 0.000 (Std. Dev. = 0.000)
Entity: Turdbull	Average sentiment: 0.642 (Std. Dev. = 0.000)
Entity: Malcolm Who	Average sentiment: 0.499 (Std. Dev. = 0.000)

Again, the complete entity analysis is dominated by political personalities.

Keyword

A total of 2,330 keywords were found in the corpus. The entire analysis result is shown in Appendix 3. An example set of 20 keywords, with their respective sentiment score average and standard deviation are as follows:

Keyword: tremendous rancour	Average sentiment: 0.360 (Std. Dev.= 0.000)
Keyword: blind eye	Average sentiment: -0.689 (Std. Dev.= 0.000)
Keyword: bitterness	Average sentiment: -0.661 (Std. Dev.= 0.000)
Keyword: gender	Average sentiment: -0.771 (Std. Dev.= 0.000)
Keyword: puppet	Average sentiment: -0.581 (Std. Dev.= 0.000)
Keyword: big companies	Average sentiment: 0.000 (Std. Dev.= 0.000)
Keyword: solidarity	Average sentiment: 0.284 (Std. Dev.= 0.000)
Keyword: Duttons	Average sentiment: -0.521 (Std. Dev.= 0.000)
Keyword: Nett_News	Average sentiment: 0.000 (Std. Dev.= 0.000)
Keyword: Voters	Average sentiment: -0.542 (Std. Dev.= 0.006)
Keyword: publicity	Average sentiment: -0.675 (Std. Dev.= 0.144)
Keyword: criminals	Average sentiment: -0.412 (Std. Dev.= 0.000)
Keyword: command	Average sentiment: -0.611 (Std. Dev.= 0.000)
Keyword: self-destructive frenzy	Average sentiment: -0.804 (Std. Dev.= 0.000)
Keyword: climate change	Average sentiment: 0.000 (Std. Dev.= 0.000)
Keyword: Um Dave Sharma	Average sentiment: 0.000 (Std. Dev.= 0.000)
Keyword: parliament house	Average sentiment: 0.000 (Std. Dev.= 0.000)
Keyword: American politics	Average sentiment: 0.000 (Std. Dev.= 0.000)
Keyword: parasite	Average sentiment: -0.751 (Std. Dev.= 0.000)

Appendix 1 - Category Analysis - Full Output

A total of 465 different categories were found in the 941 document corpus. All categories by frequency were as follows:

The total number of categories in the corpus is: 465

/law, govt and politics/government/parliament

218

/health and fitness/disorders/mental disorder/panic and anxiety

Appendix 2 - Entity Analysis - Full Output

A total of 357 unique entities were identified by Watson NLU in the corpus. The entities, and their respective sentiment

score average and standard deviation are as follows:

/home and garden/appliances/small appliances/coffee maker

1

/home and garden/bed and bath/bedroom

1

/business and industrial/business operations/human resources

1

/style and fashion/footwear/sandals

1

/travel/specialty travel/adventure travel

1

/technology and computing/consumer electronics/camera and photo equipment/cam

eras and camcorders/camcorders 1

/automotive and vehicles/boats and watercraft

1

/pets/birds

1

/technology and computing/consumer electronics/camera and photo equipment/tel

escopes 1

/home and garden/appliances

1

/science/physics/atomic physics

1

/science/physics/space and astronomy

1

/law, govt and politics/legal issues/criminal law

1

/sports/basketball

1

/technology and computing/programming languages/javascript

1

/technology and computing/consumer electronics/game systems and consoles/xbox

1

/science/social science/linguistics/translation
